

Javascript Forms Lab February 2016

Exercise 1:

Create a web page using forms tag element. The page should look similar to the following:

Welcome to Forms exercise

Working with forms

First Name:

Last Name:

Password:

☐ Female

☐ Male

☐ I have a bike

☐ I have a car

Username:

Save this page as forms.html.

Exercise 2:

Create an onclick function for the button submit. Name the function check(). This function should display the first name and last name in a paragraph just underneath the submit button. Example:

Welcome to Forms exercise

Working with forms

First Name:

Last Name:

Password:

☐ Female

☐ Male

☐ I have a bike

☐ I have a car

Username:

User is Kevin O'Brien.
